

ABSTRACT

[0029] An improved craft trimmer assembly for cutting material such as paper and card stock. The improved craft trimmer assembly includes a cartridge assembly that is removably connected to a base. The cartridge assembly comprises a cartridge and a sleigh, with a blade fitting within the cartridge. The improved craft trimmer also includes a measuring arm that is rotatably connected to the bottom of the craft trimmer board. The measuring arm includes a raised surface which aligns flush with an interchangeable plate on the top of the craft trimmer board.
